3Run | Debug | Profile

4void main() {

5  runApp(const MyApp());

6}

7

8class MyApp extends StatelessWidget {

9  const MyApp({super.key});

10

11  // This widget is the root of your application.

12  @override

13  Widget build(BuildContext context) {

14    return MaterialApp(

15      title: 'Flutter Demo',

16      theme: ThemeData(

17        // This is the theme of your application.

18        //

19        // TRY THIS: Try running your application with

20        // the application has a blue toolbar. Then,

21        // try changing the seedColor in the colorScheme

22        // and then invoke "hot reload" (save your changes

23        // reload" button in a Flutter-supported IDE, or

24        // the command line to start the app).

25        //

26        // Notice that the counter didn't reset back

27        // state is not lost during the reload. To reload
